

# ERCCIS Biodiversity Action Plan (BAP)

## Priority Habitat Interpretation Key

### Coastal and Floodplain Grazing Marsh

#### Determinant

Definitely is

Probably is

### Saline Lagoons

#### Determinant

Definitely is

Probably is

### Coastal Saltmarsh

#### Determinant

Definitely is

Definitely present but not mappable

Probably is

### Coastal Sand Dune

#### Determinant

Definitely is

Definitely present but not mappable

Probably is

### Coastal Vegetated Shingle

#### Determinant

Definitely is

Probably is

### Mudflats

#### Determinant

Mud and Shingle

Sand and Mud

Sand and Shingle

Mud

Sand

Shingle

### Reedbeds

#### Determinant

Definitely is

Definitely present but not mappable

Probably is

### Fens

#### Determinant

Definitely is

Definitely present not mappable

Probably is

### Lowland Heath

#### Determinant

Definitely is

Definitely present but not mappable

Probably is

### Blanket Bog

#### Determinant

Probably is

### Lowland Calcareous Grassland

#### Determinant

Probably is

### Lowland Meadows

#### Determinant

Definitely is

### Purple Moorgrass & Rush Pastures

#### Determinant

Definitely is

Definitely present but not mappable

Probably is

### Sabellaria Alveolata Reefs

#### Determinant

Definitely is

### Upland Heath

#### Determinant

Definitely is

Probably is

### Upland Oak Woodland

#### Determinant

Definitely is

Definitely present but not mappable

Probably is

### Lowland Mixed Deciduous Woodland

#### Determinant

Definitely present but not mappable

Probably is

### Wet Woodland

#### Determinant

Definitely is

Probably is

### Upland Mixed Ash

#### Determinant

Definitely is

Definitely present but not mappable

Probably is

### Lowland Woodland Pastures and Parkland

#### Determinant

Definitely is

Probably is
